a quick book to help you understand  
what localites is all about

**localites**  
travel the **real** world

# What is localites?

A global community that connects travelers to natives or residents globally and solves a number of travel inconveniences:

- Unknown local transportation issues
- Language barriers for travelers to understand and experience local cultures
- Where Google fails; a localite navigates
- Fear of traveling to unpopular local spots in a city
- Fear of facing cultural/traditional insults because of lack of knowledge
- Eating with localites at locally-known spots to save money while traveling
- Meet travelers even if you're in your home city
- Earn while you take travelers on a local tour of your city just like two friends are meeting after a long time

travel the **real** world

# How does it work?

If a traveler is looking for a localite to connect with or travel together or make friends in any city, they can simply search for people from that city from the community application and send them their trip or friend request.

As soon as the [next] localite accepts the request, they both can use the in-built chat platform to communicate **without** sharing their contact details with each other and decide where-to-meet, when-to-meet etc.

## **Find. Connect. Travel. Earn.**

If the traveler (a localite who is traveling) has sent the trip request to a localite who charges an hourly price, the traveler will make the payment offline after both meet and as per their conveniences.

# Safety tips:

- Review profiles very carefully
- Write a reference after every trip
- Send requests to multiple localites
- Report negative experience
- Increase your credibility of your profile by making more friends
- Trust your instincts
- Go through community guidelines
- Don't share your contact details unless you feel comfortable

# How to join the community?

Just download the community app from  
**Google Play or App Store** and  
complete your profile!
